DETAILED ACTION

Applicant's Amendment filed 5/12/08 has been entered and carefully considered. Claims 1, 3, 5, 6 have been amended. Claim 2 has been canceled. Claim 1 is allowable over prior art of record. Limitations of amended claim 5 have not been found to be patentable over prior art of record and newly discovered prior art, therefore, claim 5 is rejected under the new ground rejections as set forth below.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 3, 4 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 3, 4 are indefinite because they depend on canceled claim 2.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 5 is rejected under 35 U.S.C. 103(a) as being unpatentable over Young (USP 3,495,603) in view of Stronginet al (USp 4,070,790).

Young discloses a wig comprising a main wig portion (10) in a form of a cap (11) having a net (col. 1, lines 57) with hair (col. 1, line 57) attached thereto, the wig having an opening (at 13) and a detachable wig (15) mounted over the opening. Young fails to show the opening along a selected central part, however, Stronging et al discloses a doll wig (10, fig. 1) comprising an opening along a selected central part (at 24) for mounting a detachable wig. It would have been obvious to one having an ordinary skill in the art at the time the invention was made to employ the central part as taught by Stronging et al into the wig of Young in order to provide a natural parting line.

Claim 1 is allowable over prior art of record.

Claim 6 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
